

NOTICE.

THE undersigned have this day effected a partnership for the manufacture of BUGGIES, CARRIAGES, WAGONS AND LIGHT PLEASURE VEHICLES of all kinds, in this city and, in order to meet the growing demand of an already established trade, we will keep constantly on hand a line of our own work, unexcelled by any either in price or quality. We will also aim to carry a cheaper grade of goods for those desiring same. We propose to run our business on a broad gauge. Content with small margins, we intend to batter down the wall of high prices with our engine of quick sales, and we challenge comparison with any. Mr. JOHN PORTER will continue with our firm and will give his personal attention to our UNDERTAKING business. Salesroom: No. 16 Nuttall Street.

MYALL & SHACKLEFORD,
West Side Nuttall Street, Maysville, Ky.

E. & B.

We call attention to the special prices we are making on

Towels, Crashes,
and Table Linens.

No. 9, W. Second St., Opp. Opera House, Maysville.

Fruits and Vegetables in season. Your patronage respectfully solicited. ¹⁸⁸⁵

SMITH'S KIDNEY TONIC-TRY IT.

MEMORIAL TO GRANT.

MEETING OF THE COMMITTEE APPOINTED BY THE MAYOR.

A Vigorous Effort to be Made to Raise \$1,000,000 for the Object—The World's Work Done—Expressing Confidence of Success—Circulars—Notes.

NEW YORK, Aug. 24.—It has been decided that the national memorial to be erected over the remains of Gen. Grant in New York shall cost at least \$1,000,000. At the meeting of the general committee of the Grant monument association, they voted to raise that sum. Only about fifty of the four hundred or five hundred gentlemen who constitute the committee met in the director's room in the Mutual Life Insurance company's building at the corner of Liberty and Nassau streets. Mayor Grace, one of the vice chairmen, presided in the absence of Ex-President Chester A. Arthur, who is chairman. George P. R. T. Greaser, secretary of the association, there were present Cornelius N. Bliss, ex-Governor Cornell, and Charles M. Vail, ex-Mayor of New York. Wm. H. Gilson, ex-Mayor of New York, and Edward Stephens, commissioner of emigration. There had been but one previous meeting, held on July 24th. Mayor Grace, in calling the committee to order, said that the meeting had been called to consider plans and means for raising forward the work of building a National monument to Gen. Grant in New York. Money sufficient to be raised, but it must be confessed, is coming more slowly than was expected. He said he would give his check for \$500. The mayor said there was no probability that the body would be moved to Washington, as the family had selected the site in accordance with the general expression of the people. The newspapers, he said, were willing to help, and he pledged himself to push forward the work, not only as a citizen but as the mayor of New York. A number of resolutions were made that work had been so long delayed in raising funds. Ex-Governor Cornell, chairman of the executive committee, explained that they had only just fairly got to work. They had given much time getting things started, and then not direct to the committee, but deposited at an office of the Western Union Telegraph company. He announced that subscription books and blanks had been prepared for members of the committee and agents. Precautions had been taken that no fraud should be perpetrated, and each book given out would have to be accounted for.

It was ordered that subscription books should be furnished members of the committee. There was a general discussion of the best means of speedily raising the money needed. In the course of this, some adverse criticism cropped out. Cornelius N. Bliss, with great warmth, declared that the executive committee, especially ex-Governor Cornell, had done its whole duty and more than was expected of it. Its work did not slow, but it would count if properly supported. It required the earnest efforts of the general committee, and they should back up the executive committee with the help they had got the machinery working well.

It was explained that sub-committees to canvass different branches of trade had been selected; that in dry goods trade he had already raised \$10,000. Volunteers offered to look after special branches—Mr. Farrell in the stationery; Mr. Little, printing; Mr. C. Moore, millinery; President Myers, of the Brewers' association; Messrs. Myers, of the Rubber and Shoe, Mr. T. A. Alexander, steamship company; Mr. Wyland, of Thorpe, Wyland & Co., agreed to look after the grocery trade.

Unfavorable comments were made that the meeting was so poorly attended. "We don't simply want a roll of names," said Cornell. "We want money." "We are waiting time," said another. "It is the greatest disgrace of the age if a grand monument is not built. After living in New York all my life I feel like selling out and getting away if it is not built. We ought to find out who are willing to work and who are not."

Several motions were made to the effect that the names of all members who are not willing to actively co-operate be dropped. But this was referred to the executive committee, with power to act.

A suggestion was made that a sum to be raised for the memorial should be specified. It was moved that it should cost at least \$1,000,000. This provoked some discussion, and Charles M. Vail, a member of the executive committee, offered an amendment that \$500,000 be raised.

Ex-Governor Cornell, who had been intensely interested in the discussion, said: "A million of dollars sounds large, but for the purpose for which we are raising the money it is a small sum. More than a half million of dollars were expended in the erection of the Washington monument; three hundred thousand dollars in the erection of the Lincoln monument. It was contemplated in the erection of the pedestal for the statue of Liberty in this harbor. The New York World alone, as you all know, has in the last few weeks raised \$100,000. Now, when you consider all these things, how small an undertaking it is to erect, on behalf of this great nation, a memorial which shall be a fit tribute, for all time, of the expression of gratitude of this people for the deliverance from the unhappy condition in which we were when Gen. Grant first came to the front as the commander of our army."

"I don't believe that the gentleman who made this motion to fix the sum to be raised at \$500,000 really is in favor of fixing that sum. If he is, he is opposed to the other sum. I suppose it is because he and those who think with him have some apprehensions that the other sum cannot be raised. I have no apprehensions whatever, and I presume I have given as much thought to the subject during the last thirty days as any gentleman here. When one newspaper alone has raised \$100,000 simply on the issue of what occurred in our history one hundred years ago—the Freedmen's battle—it is in such a short time, how little it is for us to raise

\$1,000,000 with all the facilities at hand and with the feeling of willingness of response on the part of the people.

"A million of dollars is the income of our people for a few minutes only in the course of a day. If each gentleman, each citizen, will give his or her income for one hour, will give the money before the call is given, we can get it. If we have responses from the community at large and from the country at large at the same time, these contributions have already been made we will have \$5,000,000. Now, I should be very sorry to have the ambition and enthusiasm of this committee dissipated by the adoption of any other standard than \$1,000,000."

Commissioner Stephens agreed with Governor Cornell. Mr. Vail said he merely wanted to get an expression from the committee by fixing the amount at \$500,000—withdraw his motion. It was then voted that \$1,000,000 should be raised. "Better say memorial instead of monument," suggested Governor Cornell when Mayor Grace put the motion. "That will give us more leeway."

Secretary Greaser reported that many gentlemen were resting on their laurels. It should be sent to the association. A number of designs and plans have also been submitted. The committee then adjourned to meet at the call of the chairman.

The following circular was sent to officers of all National banks in the United States: "This object, that such channels of communication with the people be opened as will afford the most practicable way of presenting the subject and getting the monies into the treasury of the association. In this connection, therefore, it has been suggested that the banking institutions throughout the country can render very desirable and efficient aid in bringing the matter to the attention of their many patrons, with whom they have so much business, and relying confidently upon your cordial approval of the object, the association will be very glad to have you place in your bank a contribution box, into which small offerings may be dropped for the benefit of the fund."

"Included herein you will find blank subscription books which we will thank you to place in the hands of your customers, persons connected with your institution, who will solicit contributions from its customers. It may not be inappropriate, also, to put up in some conspicuous place in your bank a contribution box, into which small offerings may be dropped for the benefit of the fund."

THE PRESIDENT COMING.

The Ohio Campaign to be Made Extremely Interesting.

COLUMBUS, O., Aug. 24.—During the state convention some Republicans were promising the Democratic a lively campaign, promising, among other things, a week's campaign when Blaine and Logan came stamping through the state.

To this a Democrat remarked, "Very well, but we will show you a more effective campaign. He insisted that a result of Hoadly's nomination would be a visit of the president to Cleveland via Toledo and Cincinnati."

The president has never been west, and could make a personal visit to the many cities at Toledo, and Cleveland, and Cincinnati, for that matter, without taking on the guise of a missionary politician. According to this, the Democratic vote in Ohio would be increased when in Washington. Its effect can be imagined. It will awaken more than ordinary interest in the campaign, and the people of Cleveland are president of the entire country will be made the more stupendous by the co-operation of Republicans and all municipal organizations. Hendricks will also appear somewhere in Ohio and give the canvass variety.

Jumped the Track.

CLEVELAND, O., Aug. 24.—While a freight train on the Cleveland and Erie railroad was going down a steep grade a short distance below the Eighteenth ward station a cow jumped the track. The cow was a black one, and was followed by a herd of other cows to follow, and all rolled in a heap in the ditch twenty feet below. There were six or eight, nine, ten, four, four, four and one horse, and a man. One of the old tanks exploded with great force, scattering the oil over everything in the vicinity and setting the train on fire. An alarm was sounded and quickly responded to, but it was impossible to do anything to stay the progress of the flames. With rumors of four trains having been burned were soon abroad, but were dispelled by the appearance of one of them, who said that they escaped by jumping before the cars left the track. A brakeman was on the bear car when the accident occurred. He jumped into the ditch, and beyond slight bruises was unharmed. Traffic on the road was suspended until 10 o'clock, when the wreck was lifted, and all trains are now running as usual.

Appointed by Will.

BALTIMORE, Md., Aug. 24.—Frank A. Hunt, paying teller at the Rutaw Savings bank, with a terrible accident on the Baltimore & Ohio railroad at Hollands station. He has been living in the country near Hollands station all summer, coming to the city every morning to work. A freight train was in motion he attempted to board it, when he fell under the wheels. His right leg was completely severed and rolled along the track for several yards. Mr. Hunt is lying in delicate health will probably die.

By the Bullet Route.

NEW YORK, Aug. 24.—Word was sent to the coroner's office of a suicide that occurred at the Astor house. Mr. M. Blaine said that the name of the suicide was C. H. Bierin, thirty years of age, and a resident of Philadelphia. He registered at the hotel and was assigned room 352. The report of a pistol was heard and upon going to Bierin's room he was found dead with a bullet wound on the right side of the head.

Hostiles.

LANONA, Ariz., Aug. 24.—A Mexican came in bringing intelligence that a band of about thirty men, armed with revolvers, pistols, rifles from Santa Cruz, Lugo, in two and wounding the third, Louis Salgado, the king. People in that section have retailed their vigils.

NATIONAL AFFAIRS.

OHIO REPRESENTATIVES AT THE NATIONAL CAPITAL.

The Political Aspect of Affairs Following Governor Hoadly's Nomination—Attorney General Garland—Army.

Ohio River Mail—News Notes.

WASHINGTON, Aug. 24.—The nomination of Governor Hoadly was fully expected by the Ohio Democrats here in Washington. They are few in number now, but hope to have an increase in their ranks before the end of the year. They election involves local questions, besides the choice of members of the legislature who will elect Senator Sherman's successor. The only Democratic of any prominence in office from Ohio is the Sixth auditor, Mr. McConville. One of his division chiefs is also from Ohio and was very anxious to go home for the purpose of conducting the election campaign. He was refused because of the fear that his presence in Ohio about the time of the Democratic convention was going to meet would be charged to political party. So far the administration officials have been very circumspect, and no cause for complaint has yet come to the notice of those in authority. Attorney General Garland has been assigned to Rock Cove springs as a guest. He is expected to leave for Washington until President Cleveland's return. A gentleman who called upon him found the mansion decorated with bachelors, the same that formerly ornamented the table of his predecessor, Attorney General Brewster. It was also noticed that most of the marble ornaments had been removed. The statuette of Henry the Fourth was also missing. "Yes," said Mr. Garland, "I have never seen it since its removal."

The portrait of one of his predecessors looked so like a picture of Jack Sheppard that he was in a restaurant for many years, and it was suggested that the likeness might be familiar to him.

"I know the place you refer to," said Mr. Garland, "but I never there. You are probably thinking of some of my former senatorial colleagues. They could undoubtedly recognize the close resemblance between Jack and his prototype on the wall."

Senator Don Cameron is now at Los Angeles, Cal. He will join him in June, and he writes that he is improving very slowly, but thinks he is gaining substantially. He will remain in California until late in the fall.

Army Intelligence.

WASHINGTON, Aug. 24.—Second Lieutenant J. T. Clarke, Tenth infantry, now at the Hotel de la Ville, Paris, has been ordered to the camp of the Iowa National guard, for the purpose of inspecting the troops taking part in the encampments, under instructions to take a review from the adjutant general of the army.

Lieut. Col. William F. Craighead, corps of engineers, has been ordered to proceed to Cherrytown Harbort, near Cherrytown light-house, Virginia, on public business, and on the completion of his duties, to return to his station to Baltimore, Md. First Lieut. Graham D. Fitch, corps of engineers, will, upon the expiration of the extension of leave of absence granted him in special orders August 13, 1885, be relieved from duty with the battalion of engineers at Cherrytown, N. Y., and will then proceed to Chattanooga, Tenn., and report to Major William R. King, corps of engineers, for duty under his immediate orders. First Lieutenant Douglas A. Howard, ordnance department, has been assigned to fourth duty at the West Point foundry, New York, with effect from April 1, 1885. Mr. Warren, corps of engineers, now of leave of absence, has been relieved from duty as assistant to Major William R. King, corps of engineers, and is expected to report for duty August 28, 1885, to the superintendent United States Military academy, West Point, N. Y.

Ohio River Mail.

LOUISVILLE, Ky., Aug. 24.—There is a great deal of excitement along the river from Louisville to Henderson on account of the postponed gubernatorial election to do away with the river mail. The people on both sides of the river, in Kentucky and Indiana, are protesting strongly and have forwarded huge petitions to Washington begging that the matter be reconsidered. The people are all good democrats, and if the order should go into effect the administration will get a black eye in that part of Indiana that may be felt in the coming election.

The Puritan.

NEW YORK, Aug. 24.—The easy victory of the Puritan over her rival, the Frisella and the other creek yachts of the New York Yacht club, the Boston Yacht club, has tended to intensify the interest in the race. At an early hour the lower bay presented an animated appearance. Yachts of all descriptions and several steamboats were moving to and fro and taking up positions in readiness to follow the competitors in the event of a start. The wind threatened. There is hardly any wind stirring and the indications at present are anything but favorable for a race.

A Cat.

SANDY HOOK, Aug. 24.—The weather is cloudy and threatening and almost a dead calm prevails. The prospects at present are that the race will not take place.

How It Stands.

NEW YORK, Aug. 24.—The Sun says: "The general passenger aspect of the trunk lines are still debarrd from advancing rates west from Buffalo by the haggling of the Erie and New York Central representatives. The latter road enjoys a small differential rate and the former wants one too. There is matter staked."

Business Failures.

NEW YORK, Aug. 24.—The business failure occurring throughout the country during the last seven days as reported to R. G. J. & Co. and numbered for the U. S. State 106 and for Canada 16.

Mr. Lockwood's Remarks.

BUFFALO, Aug. 24.—A great representative called on Hon. Daniel Lockwood in reference to the allegation in the New York Tribune that Mr. Lockwood had become a bitter opponent of the administration. Mr. Lockwood replied that there was not a word of truth in the Tribune's statement. "My relations with the administration," he said, "are just as pleasant as a coral at ever, and I will continue to do whatever I can to advance the best interests of the Democratic party." Referring to the rumor that he had been named for the American ministry, Mr. Lockwood said: "It is news to me."

To Give the Snag Away.

CHICAGO, Aug. 24.—A movement is on foot to secure the pardon of "Dutchy" O'Keefe, the Third ward ballot box burglar, who is now serving a term in Joliet. O'Keefe, it is said, is willing to make public the whole story of the theft of the retrial, provided he is assured of a release from prison. It is the wish of many of the Irish Hall politicians, an ex-aiderman and a prominent South Side democratic politician, "O'Keefe says the ballot boxes are still intact and will be produced if he is pardoned."

Honored Father.

NEW YORK, Aug. 24.—The reported failure of H. N. Smith, the well known Wall Street operator, is still the subject of comment on the exchange. It was said that Mr. Smith had probably lost much money, but as yet he had not made any assignment. The excitement caused by Mr. Smith's reported failure, has subsided. Those who are best acquainted with his financial affairs doubt the correctness of the assignment, and they expect to see him on the street in a day or two. His office was closed.

John P. Rogers Arrested.

KNOXVILLE, Tenn., Aug. 24.—State Senator John P. Rogers, of Union county, was arrested on a charge of violating the United States revenue law and given a hearing before United States Commissioner Green. Mr. Rogers is a prominent member of the Maynardville, Tenn., bar. He was appointed United States commissioner by President Grant in 1868, and was elected to the legislature, and in 1884 was returned to the state senate.

Burning Wool.

CHICAGO, Aug. 24.—The extensive hide, wool and tallow works of O'Brien, Howes & Company, located at the corner of La Salle and Michigan streets, was set afire by lightning. The top floor was stored with wool, and the flames spread rapidly. It was, however, confined to the upper floor, with a damage to stock and building of \$75,000; fully insured.

On the Gould System.

ST. LOUIS, Aug. 24.—A Wall Street proceeds much as usual upon the Gould system the order to refuse to handle or repair Wall Street stock is not yet acted upon. The action of the Chicago Board of Trade leads to the belief that they are preparing a grand surprise for next week. A prominent member of the engineers who is reported indifference of the engineers to the movement was without effect. He predicted positive action by the engineers should a general strike be agreed upon.

A Grand Jury Find.

MANNAN, Ark., Aug. 24.—The grand jury found an indictment against Marquis De Mowat, a son of William H. De Mowat, late in the Missouri, at St. Louis, 1885. The Marquis is the eldest at present. Court sits ten days longer, and if the Marquis can be reached in time he will probably be tried at that term. At the time De Mowat was shot the case came before two justices of the peace who acquitted Marquis.

McCauley.

CINCINNATI, Aug. 24.—Manager O'Brien received the following telegram: "PHILADELPHIA, Aug. 21. J. B. O'Brien—Bridget Hotel. Leave at 8:15. Stop no place."

DOMINICK McCaffrey.

McCaffrey reached the city at 4:45 and was taken at once to his training quarters, where all things were in readiness for his reception.

A Twelve-Year-Old Mother.

PHILADELPHIA, Aug. 24.—A girl, little more than twelve years old, gave birth to a male child. The mother's name is Susan B. Hamilton, and lives with her parents in Hamilton street. She says the father of the late is Dr. Chas. Hamilton, who worked in a laundry, but who can not now be found. Great indignation is expressed by people living in the vicinity.

He Was a Coward.

NEW YORK, Aug. 24.—A bare face fight for \$500 a side was to have taken place at Bay Ridge, between John Ashton, of Providence and Joe Denning. Ashton was arrested at West Brighton, but got out on bail and was at the place of meeting on time. Denning did not appear and the sports went away angry. "Joe Denning wanted proof there was money in the affair."

Mining Reduction.

PITTSBURGH, Aug. 24.—The miners employed by Vinton & Co., in the tunnel pit, have accepted the offer of Vinton & Co. to firm, resuming work at two and one-quarter cents per bushel. The action was unexpected. The miners had been working for as low as the Monongahela for years. It was the fourth pool in a number of pits are working at one and three quarter cents.

Yellow Fever Patient Dies.

NEW YORK, Aug. 24.—John J. Snyder, the yellow fever stricken away from the bark John Olson, who was found in a hallway on State street, died in the hospital. The patient has been under quarantine for fumigation, and the health officers are searching for members of her crew who are at large around the city.

Maxwell in Court.

ST. LOUIS, Aug. 24.—Maxwell was brought into court for examination, but on account of the absence of Judge Noonan he was remanded to prison. Judge Francis, who was upon the bench, did not desire to see in the case, his firm being retained for the defense.

Peterson's Daug.

AUBURN, N. Y., Aug. 24.—Franz Joseph Peterson has been hung.

THE TURKISH ALLIANCE

HENRY D. WOLFF QUARANTINED AT CONSTANTINOPLE.

Prince Henry of Reuss is out of the running for the Brunswick's Duchy. Victims of the Plague—Rites in the Canaries—Foreign Affairs.

LONDON, Aug. 24.—Sir Henry Drummond Wolff has arrived at Constantinople, but must remain under quarantine for a few days. There is much discussion as to whether or not his mission to the Porte will be successful. The Standard urges the great importance of securing an alliance between England and Turkey, and expresses a hope that he will be successful in securing the desired alliance. The Standard correspondent in Berlin, however, says: "An eminent Turkish diplomatist declares that the Sultan and the grand vizier oppose an alliance of Turkey with England against Russia." In an interview Sir Henry Wolff stated that he is ignorant of the reported Anglo-Turkish alliance. His mission, he said, concerned the relations between England and the Sultan and Egypt.

The Constantinople correspondent of the London Standard says: "Great interest is evinced among the Sultan's entourage in the approaching arrival of Sir Henry Wolff and in the object of his mission. Evidently communications have passed between the two governments, which create the hope of an understanding becoming impossible. Otherwise the eventuality of the dispatch of 4,000 Turkish troops under the command of Deviah Pasha, to co-operate with the English in Egypt, would scarcely have been mooted within the privileged circle, and this has actually been discussed. In view of the possibility of an Anglo-Turkish agreement the partisans of Tewfik's rival for the Egyptian viceregal throne are particularly active in endeavoring to secure the favor of the Sultan for the pretenders Halim and Ismail Pasha. In the event, though it is not particularly likely, that of the Sultan favoring a change of khedive. The doubts expressed in a former dispatch regarding the success of Sir Henry Wolff's mission are also shared by an informant, who deplores the known habit of the Sultan to consult one ambassador and then another. This process, in consequence of the antagonistic counsel of ambassadors and the members of his own entourage, cause the Sultan to alter his opinion several times in one day. The whole diplomatic body is on the alert to learn what is going on and what may be the object of Sir H. Wolff's mission. The Sultan's entourage is especially active, and its wish, De Noldoff, is doing his utmost to dissuade his government from entering into any engagements with England."

The Brunswick Duchy.
VIENNA, Aug. 24.—The candidature of Prince Henry of Reuss for the ducal throne of Brunswick has come to nothing. The reason given is that the prince is not possessed of a fortune sufficiently large to enable him to support the new dignity. Now the name of the hereditary prince, William of Nassau, comes to the fore as a candidate for the ducal throne of Brunswick. The hereditary prince is colonel in the Austrian regiment of Hussars named after Grand Duke Nicholas of Russia. He has gone to Berlin, having been summoned thither. His cousin in the regiment say that he has gone there to be weighed, as to his fitness for the Brunswick succession.

There is some probability that the Nassau prince may yet find himself ruler in the ancient duchy of the Guelphs. The fact that his father, the Duke of Nassau, made his peace with Germany a few years ago, after being deprived of his inheritance after the war of 1866, is considered as greatly favoring his chances. There will, however, it is thought, be another strong effort made to secure the vacant throne for the Duke of Cumberland. It has been announced that both the Prince of Wales and the czar of Russia intend to visit the duke at his residence at Gumbelton, on Lake Traun, during the autumn, when efforts will probably be made to induce him to accept the inevitable as regards the kingdom of Hanover, and thus clear the way for fresh negotiations about the ducal throne of Brunswick.

Victims of Cholera.
MARSEILLES, Aug. 24.—Cases of cholera continue to increase in number, and even the mayor admits that, out of the 100 deaths which occurred, 75 were caused by cholera. Many of the other deaths were the result of typhus fever. At the Pharo hospital 17 deaths have occurred within the last twenty-four hours. A soldier and his two little children, all three the victims of cholera, were buried in one grave in a village cemetery in the outskirts of the city. The doctor reports many fatal cases where they can discover no influence on the part of the victims of the disease.

At Tunis the officials seem to be imitating the cowardly conduct of the mayor of this city, and the uneasiness of the people is increased by the continually accumulating filth of the town and by the absence of all precautionary measures. It is admitted that eight deaths have been caused by cholera within the last twenty-four hours.

Much disappointment is felt at the government having ordered the remains of Admiral Courbet to be landed at Hyeres owing to the prevalence of cholera in Tunis. Great preparations had been made there for the reception of the body and a magnificent catafalque, representing the interior of a ship, had been erected to bear the coffin.

Rites in the Canaries.
MADRID, Aug. 24.—Rites occurred at Santa Cruz de Santiago, the capital of the Canaries Islands, on the 22nd inst. The Spanish general civil governor from Cadix without their having obeyed the quarantine regulations. There was considerable fighting in the streets and the chief of the military staff was wounded by the explosion of a bombshell. All the local authorities have resigned, and the people, panic-stricken through their fear of cholera being introduced into Canaries from Spain, are fleeing by hundreds into the interior of the island of Tenerife and to the other islands.

Catherine Gambetta Dies.
ROME, Aug. 24.—Catherine Gambetta, a relative of the late Gambetta, the French statesman, has died at Lancers in poverty, at the age of 100 years. Her funeral expenses were paid by the commune.

The Congo.
LONDON, Aug. 24.—The latest African advice state that the Congo free state is endeavoring to obtain natives from the Dutch Indies for the purpose of organizing a police force.

DR. PRICE'S CREAM BAKING POWDER

MOST PERFECT MADE

Prepared by a physician with special regard to health. No Ammonia, Lime or Alum.

SCENE IN FRANCE. Gathering Groups for Making Cream of Tartar for PRICE'S CREAM BAKING POWDER.

A QUESTION ABOUT Brown's Iron Bitters ANSWERED.

The question has probably been asked thousands of times: "Will it cure?" But it does not cure any disease for which a reputable physician would prescribe such a medicine. For as the best scientific expert known to the profession, and inquiry of any leading chemical firm will substantiate the assertion that there are no preparations of iron that of any other substance used in medicine. It shows conclusively that iron is acknowledged to be the most important factor in medicinal practice. It is, therefore, not surprising that the most successful of all BROWN'S IRON BITTERS is so perfectly adapted for all cases of weakness and disease.

BROWN'S IRON BITTERS is not a medicine, but a food, and produces no action on the system. It is a tonic, and its effect is to strengthen the system, and to give it the power to resist disease. It is a food, and its effect is to strengthen the system, and to give it the power to resist disease. It is a food, and its effect is to strengthen the system, and to give it the power to resist disease.

For as the best scientific expert known to the profession, and inquiry of any leading chemical firm will substantiate the assertion that there are no preparations of iron that of any other substance used in medicine. It shows conclusively that iron is acknowledged to be the most important factor in medicinal practice. It is, therefore, not surprising that the most successful of all BROWN'S IRON BITTERS is so perfectly adapted for all cases of weakness and disease.

The question has probably been asked thousands of times: "Will it cure?" But it does not cure any disease for which a reputable physician would prescribe such a medicine. For as the best scientific expert known to the profession, and inquiry of any leading chemical firm will substantiate the assertion that there are no preparations of iron that of any other substance used in medicine.
